### PROFILE

First-Class Information Technology for Business graduate with 12 months of digital experience at Jaguar Land Rover and current B2B technology account experience at Currys. Translate user behaviour and business requirements into practical improvements across digital journeys, content operations and customer processes. Experienced with Decibel, Adobe Experience Manager, Figma, SQL and Power BI, plus cross-functional delivery with UX, engineering and agency teams.

### CORE SKILLS

**Digital analytics:** Decibel by Medallia, heatmaps, session replays, clickstream analysis, journey analysis, segmentation, CRO and insight reporting

**Product and business analysis:** Requirements gathering, user flows, journey mapping, process mapping, wireframing, information architecture and stakeholder communication

**Data and technology:** SQL, Power BI, Excel, Python, R, Adobe Experience Manager, Figma, HTML, CSS, JavaScript, Jira and DevOps ticketing

**Commercial operations:** B2B account management, technology procurement, Maginus ERP, quotes, invoices, order fulfilment and aftercare coordination

### PROFESSIONAL EXPERIENCE

#### Currys | B2B Account Executive, Currys Business Hub

Nov 2025 - Present

Manchester, UK | Transferred from Coventry in Jul 2026

- Manage business customer accounts and technology enquiries across phone, email and in-store channels, translating requirements into appropriate product, service and fulfilment recommendations.
- Prepare quotes, invoices and purchase-order documentation, and process multi-line orders in Maginus ERP with accurate pricing, customer records and fulfilment status.
- Coordinate with store operations, logistics, installation and aftercare teams to resolve availability or delivery issues and keep customers informed through to completion.
- Develop local business relationships and follow-up opportunities while maintaining awareness of competitor offers and commercial account terms.

#### Jaguar Land Rover | Digital Experience Analyst, Industrial Placement

Jul 2023 - Jul 2024

Gaydon and Whitley, UK | New Jaguar Digital Experience and UK National Sales Company rotations

- Delivered 23 digital-journey insights, above an individual target of 20, using Decibel heatmaps, session replays and clickstream analysis across Jaguar and Land Rover websites; presented prioritised findings to the product team.
- Authored and refreshed 150 retailer pages in Adobe Experience Manager, updating financial terms, test-drive forms, hero content, vanity URLs and model-release information accurately to campaign requirements.
- Gathered and documented e-commerce user-flow requirements, refined Figma wireframes and communicated specifications and feedback to Accenture through iterative workshops.
- Benchmarked automotive agency-model journeys and translated findings into 5-10 actionable UX and functionality recommendations for the future New Jaguar digital experience.
- Proposed a weather- and location-aware personalisation framework for Land Rover nameplates, mapping seasonal content rules and presenting the concept for stakeholder validation.
- Researched sticky navigation, content consolidation and CTA-focused PPC landing-page concepts to shorten pages and improve journey clarity.

## EDUCATION AND AWARD

---

### Coventry University | BSc (Hons) Information Technology for Business

Sep 2021 - Jul 2025

- First-Class Honours; awarded the Information Technology for Business Excellence Prize for the highest overall grade in the 2025 cohort.
- Relevant study included data science, database management, business systems, project management, operational research, web technologies and cyber security.

## SELECTED PROJECTS

---

### Coventry Digital Suite, student portal prototype

2025

- Designed and built an HTML, CSS and JavaScript prototype unifying grades, timetables, document requests and notifications; defined the information architecture and user flows, then ran a comparative usability survey to guide iteration.

### Site research and financial modelling pipeline

2026

- Designed and orchestrated a 16-step site-evaluation workflow using 8+ public data APIs, an 18-metric scoring model and financial projections. Reduced analysis time from 2-4 hours to under 25 minutes across 8+ candidate locations while improving consistency and auditability.

### Multi-portal franchise operations platform

2026

- Specified a platform across three role-based portals, 12+ functional modules, 93 pages and 217 API operations; defined data models, user flows, location scope and business rules while directing AI-assisted implementation.

### Relational database design and implementation

Academic project

- Designed a relational data model, produced entity-relationship diagrams, normalised the schema to third normal form and implemented and tested SQL queries for a defined business scenario.

### Data science and machine learning

Academic project

- Cleaned and prepared structured datasets in Python and pandas, then applied regression, classification and feature-engineering techniques in scikit-learn with documented model evaluation.

## ADDITIONAL EXPERIENCE AND LEADERSHIP

---

### German Doner Kebab | Shift Manager, part-time alongside study Nov 2021 - Apr 2023; Sep 2024 - Jan 2026

Coventry, UK

- Led teams of 15+ during busy service periods at a high-volume branch, allocating work and monitoring service speed, quality and customer-experience KPIs.
- Delivered structured training and performance coaching, supported shift scheduling and resolved operational issues in real time.

**University leadership:** Executive Media Officer, Coventry University Students' Union (Oct 2022-Jun 2023); Vice President, Islamic Society (Aug-Dec 2022).

**Earlier experience:** Temporary Assistant Manager, Oodles Chinese (Apr-Jun 2023); Team Member, KFC UK & Ireland (2021, 4 months).

## PROFESSIONAL DEVELOPMENT

---

**JLR training:** Adobe CMS authoring, Decibel digital analytics, cyber security fundamentals, privacy and data protection, and cross-functional collaboration

**Placement feedback:** Rotation supervisors highlighted repeated high-quality delivery, clear explanation of data-backed decisions and a positive response to feedback
